

MOHNISH RAMACHANDRAN

+1 (984) 382-9178 — Raleigh, NC — mramach2@ncsu.edu — [LinkedIn](#) — [GitHub](#)

OBJECTIVE

AI/ML Engineer with a strong foundation in Computer Vision, LLMs, and Generative AI, seeking to apply machine learning and data science expertise at Databricks. Passionate about leveraging data-driven insights, scalable ML solutions, and modern AI frameworks to advance real-world applications in analytics and intelligent systems.

EDUCATION

Master of Computer Science, North Carolina State University Aug 2025 - Present
Coursework: *Artificial Intelligence, Design & Analysis of Algorithms, Automated Learning & Data Analysis*
CGPA: 3.45/4.00

Bachelor of Technology, SRM Institute of Science and Technology, Chennai, India 2021 - 2025
Degree: B.Tech in Artificial Intelligence **CGPA: 9.14/10.00**
Coursework: *Neural Networks & Machine Learning, Image & Video Processing, Reinforcement Learning*

SKILLS

Languages	Python, C++, SQL, HTML, CSS
AI/ML	PyTorch, TensorFlow, Scikit-learn, OpenCV, Hugging Face, Transformers, ONNX, NumPy, Pandas
Tools	Git, Docker, Streamlit, FastAPI, MySQL, Tableau

EXPERIENCE

Research Fellowship Feb 2024 - June 2024
HyperVerge Inc. *India*

- Project: *Qualitative and Quantitative Analysis of Deepfakes*
- Studied deepfake generation using autoencoders and GANs
- Implemented SOTA detection models and explored generalization strategies.

Data Analyst Intern Jun 2023 - July 2023
Olimind Inc. *San Francisco, CA*

- Analyzed the raw input data and identified various trends, patterns, and useful insights in user data.
- Designed interactive visualizations to explain to the mentor.
- Created interactive dashboards in Looker Studio for real-time app activity, increasing visibility and reducing manual report prep for mentors.

PROJECTS

Arrow Object Detection Developed an arrow detection module for rover navigation using SSD-MobileNet and YOLOv5; exported trained models to ONNX and managed the complete pipeline from data collection to deployment.

Cancer Detection Designed an ensemble framework for breast cancer classification by integrating CNNs (VGG-16, InceptionResNetV2, ResNet-50, Xception) with a fine-tuned Hugging Face ViT.

Music Recommendation Using Sentiment Analysis Built a sentiment-aware music recommendation system by applying CNN-based text classification on user input.

AI Travel Agent Built an Agentic AI that helps plan trips for its users using an LLM model + API tool calls to get information on places

CERTIFICATIONS

Deep Learning Specialization (5 courses)	DeepLearning.AI
Machine Learning Foundations	AWS Academy
Cloud Foundations	AWS Academy
Python101 for Data Science	CognitiveClass.ai

LEADERSHIP AND ACTIVITIES

- Lead a team of 6 during the HyperVerge research fellowship. Was the main point of contact between industry professionals and the team.
- Mentor during my second year at RUDRA-Mars Rover Team (College team) for the incoming developer team.
- International Rover Challenge (IRC-24): Achieved 2nd Runners-up
- International Rover Drone Challenge (IRDC-24): Achieved 2nd Runners-up
